

FIELD DAY

BIOCHAR & CROP PRODUCTION

Natural Resources Adelaide and Mt Lofty Ranges with **SANTFA** present a **FREE field day** demonstrating the application of biocharred piggery litter to cropping paddocks.

Biochar can aid in retaining nutrients, improving soil structure, water-holding capacity, decreasing releases of non-CO² greenhouse gases, and improving animal health and production.

FREELING

21 June 2013

Time: 2.00 till 5pm

BBQ dinner provided

The field day covers:

- » results of applying biochar to piggery litter
- » results of adding treated piggery litter to cropping paddocks
- » different biochar products and production
- » operating a biochar machine on-farm and value adding through N-retention.
- » other SANTFA biochar trials.

Presenter details:

- » Greg Butler, SANTFA
- » Russell Burnett, Northern Poultry Cluster
- » Two local producers
